Office Action Summary

Receipt is acknowledged of IDS, Correction, Extension, Declaration, and amendment of respectively.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 are drawn to methods, classified in class 424, subclass 409.
- II. Claims 4, 6, 7 are drawn to concentrate, classified in class 423, subclass 102.
- III. Claims 5, 8 and 9, are drawn to compositions, classified in class 514, subclass 675.

The inventions are distinct, each from the other because:

the group I methods are independent and patentably distinct, from those of the concentrate and compositions II and III, as other actives may be used with group I, such as hot pepper.

Group II is independent and patentably distinct from III, as the concentrates of II may be used in other compositions such as perfumes, and the compositions can include other agents.

The groups I-III have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, the search for any 1 group is not required for any other group, and a search and examination of the entire application would place an undue burden on the Examiner, the present restriction requirement is proper for examination purposes.

This application contains claims directed to the following patentably distinct species of the claimed invention: for groups II or III, if elected: Bútering agent: Sucrose?

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 4, 5 and 9 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Neil Levy whose telephone number is 308-2412. The examiner can normally be reached on Tuesday- Friday 7:00 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose Dees can be reached on 308-4628.
